

Esco Cleanroom Airshowers

Cross-Contamination Facility
Integrated Barrier

EAS-EUS

EAS-EUS

Introduction

Esco Air Showers (EAS) is self-contained chambers strategically positioned at cleanroom entrances and other controlled environments. These chambers minimize particulate matter from infiltrating the clean space. As personnel or materials pass through, the EAS “scrubs” by high velocity HEPA-filtered air jets with velocity of 18-30 m/s (3,543 - 5,906 fpm). The contaminated air is drawn from the base, filtered, and then recirculated into the chamber maintaining a clean environment.

Esco is the pioneering company for the construction of air showers with different applications on areas in the micro-electronics, semiconductors, pharmaceutical, spray painting, laboratory animal research and food markets.

Cleanroom Applications: As the greatest source of particulate contamination in a cleanroom is the operator, air showers serve as a critical preventive measure. As it is place between change areas and cleanroom, it reinforces the cleanroom protocol acting as a physical barrier that emphasize the importance of maintaining a controlled environment.

Pharmaceutical and Lab Animal Research Applications: Air showers maintain the cleanliness of the pharmaceutical production and laboratory animal breeding areas. It can also minimize egress of hazardous substances and allergens entering the controlled environment.

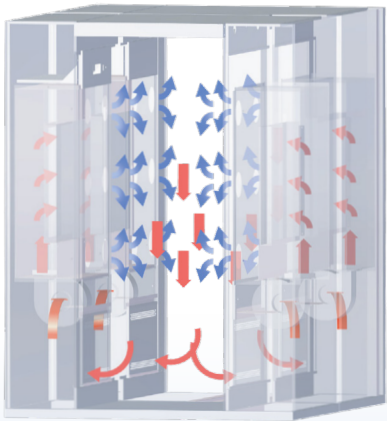

Main Features

- High velocity shower jets in excess of 18 m/s to ensure efficient scrubbing action to remove particulate matter.
- Operating modes can be programmed in the field.
- Microprocessor controller supervises all functions.
- HEPA (H14) filter (as per EN1822) and ULPA filter (as per IEST-RP-CC001.3) achieving >99.995% typical efficiency at 0.3 micron particles.
- A disposable pre-filter with 90% efficiency.
- An emergency stop button is mounted on both sides of the shower.
- Indicator lights mounted on both sides of the exterior of the air shower to regulate traffic flow, in and out of the cleanroom.
- Permanently lubricated direct drive centrifugal blowers used in conjunction with stainless steel air nozzles.

EAS Cleanroom Air Shower Series Comparison Chart		
Model	Airflow	Door
EAS (A-Series)	Single Sided	Single leaf
EAS (B-Series)	Double Sided	Single leaf
EAS (C-Series)	Double Sided	Double leaf

See the Specification Chart for more details.

Air Shower Filtration System

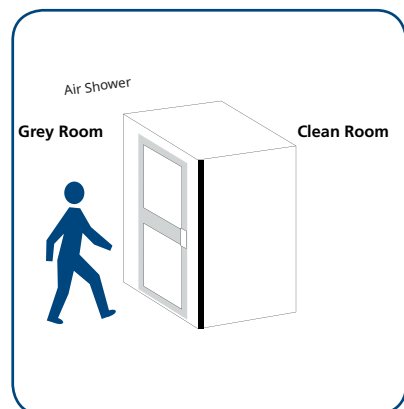

HEPA Filter
Blower

■ HEPA-filtered air
■ Unfiltered/potentially contaminated air

- Air is forced by the blower(s) through HEPA filter(s) which are 99.995% efficient against particles of 0.3 microns.
- Filtered air is ejected through nozzles at high velocities into the chamber. These turbulent air streams disperse particulate matter on all surfaces.
- Dispersed particulate matter migrate with the air stream towards the lower areas in the air shower chamber. Air enters the blower supply plenum through pre-filter(s) installed at the base of the chamber.
- The air is continuously filtered and recirculated. The air shower is a selfcontained device and does not exchange air with the environment it is placed in.

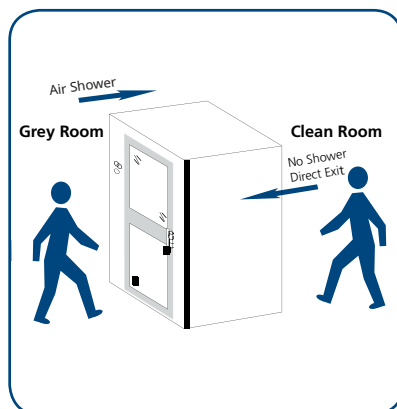

Air Shower Operating Sequences

Unlike conventional air showers which are delivered with a fixed operating sequence, the Esco Air Shower's operating sequence may be selected from three pre-programmed sequences:

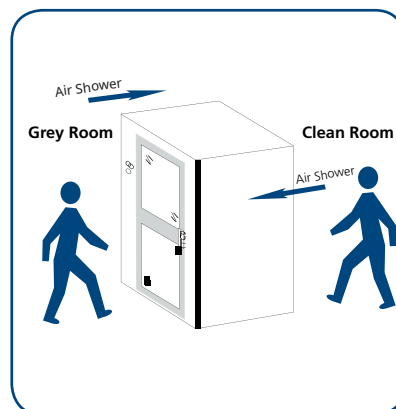

One-Way

Personnel may enter the controlled environment but not exit through the air shower. At the idle state, the clean side door is locked while the grey side is unlocked. This mode of operation is useful for controlling traffic patterns in and out of the controlled environment.

Two-Way One-Way

Personnel may enter or exit the controlled environment through the air shower. The air shower will be activated if personnel enter from grey room. The air shower program is able to detect if the person is entering or exiting the controlled environment via door sensors and a time-sequenced control.

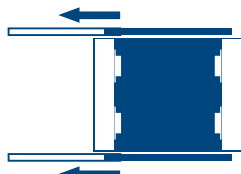

Two-Way

Personnel may enter or exit the controlled environment through the air shower. In both directions the air shower is activated. This mode of operation is useful in pharmaceutical and lab animal research applications to prevent the egress of hazardous substances and allergens from the controlled environment.

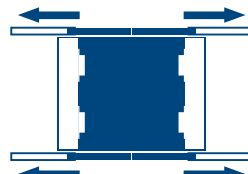

Optional EAS Shutter Doors

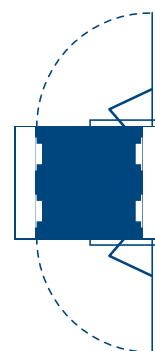

Vertical Shutter Door

Single

Double

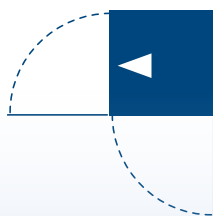

Auto Swing Door

Optional EAS Exit Directions

Straight-through

L-Shaped

*Turn Left or Turn Right as per client's specifications

EAS Blowing Type

Single Side Blowing (EAS-A series)

Optional Three Side Blowing
*With Top Blowing

Double Side Blowing (EAS-B and C series)

Cleanroom Air Showers

Light Diffuser

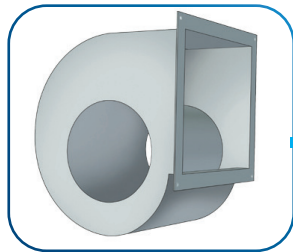

Diffusers ensure and uniform lighting throughout the chamber.

Light Indicator and Emergency Switch

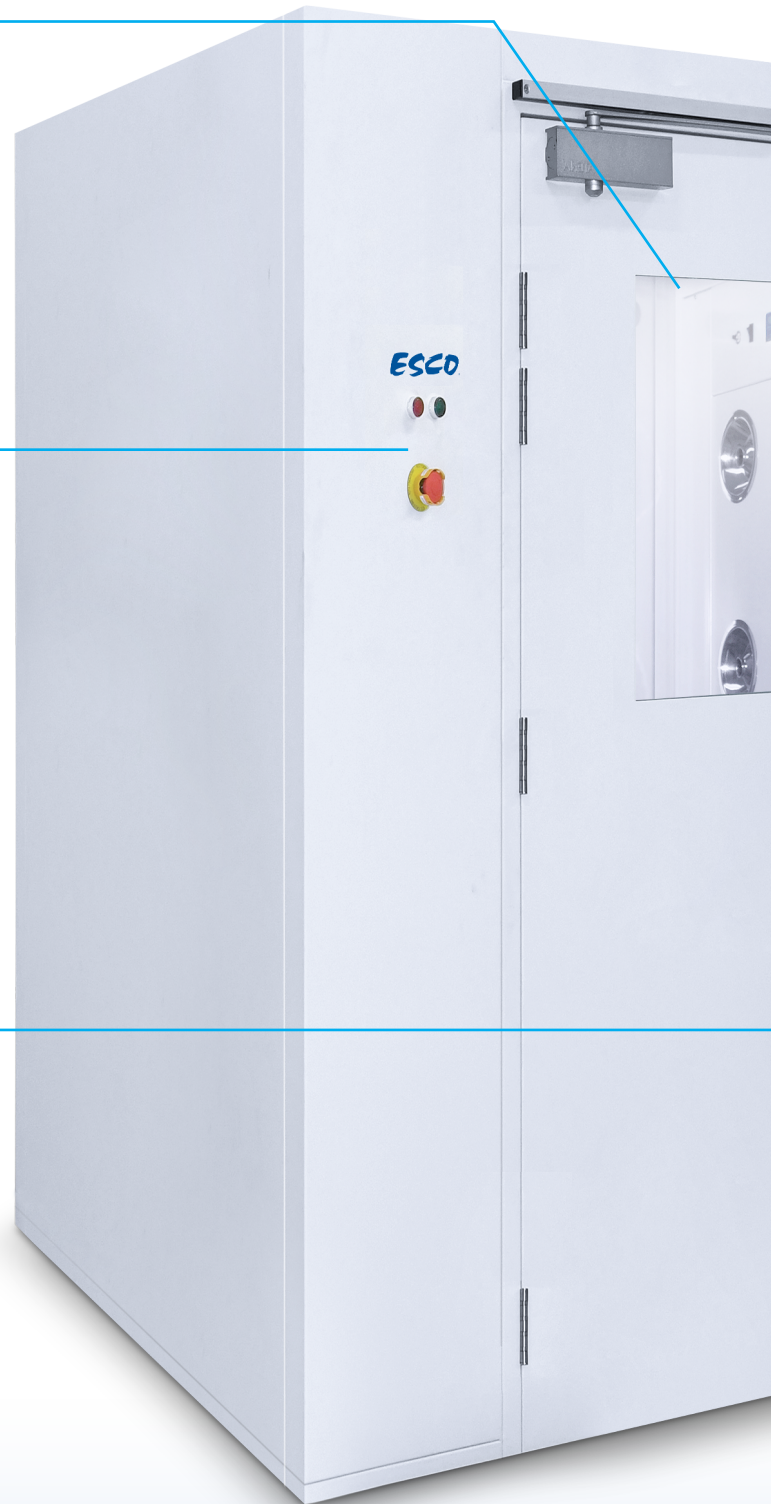

Indicator lamps indicate if doors are locked or unlocked, thereby regulating the flow of personnel in and out of the air shower.

Emergency buttons mounted on both external faces of the shower unlock all doors instantly.

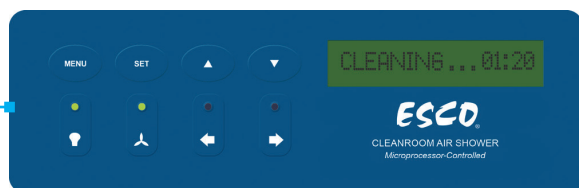

High Performance Blower System

German made ebm-papst® permanently lubricated centrifugal motor/blowers with external rotor designs. Motors selected for energy efficiency compact design and flat profile. Completely integrated assembly optimizes motor cooling. All rotating parts balanced for smooth, quiet, vibration-free operation.

Esco Cleanroom Air Shower
Model EAS-1B9-EUS

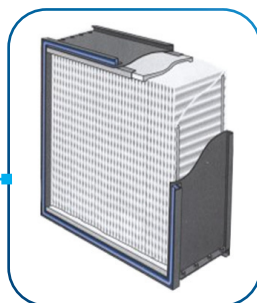

Sentinel Microprocessor Control System, Programmable

The microprocessor control detects improper operation and displays corresponding error messages should the integrity of the cleanroom be violated. The LCD displays shower duration and countdown, and reports cycle progress and operational status. A 24-hour clock displays local time.

Stainless Steel Nozzles

An array of stainless steel nozzles direct high-velocity jets within the chamber.

HEPA Filtration System

HEPA filter(s) provide 99.995% typical efficiency for particles size up to 0.3 microns.

Door

Electro-galvanised steel door with glass windows permitting visibility

Key Features

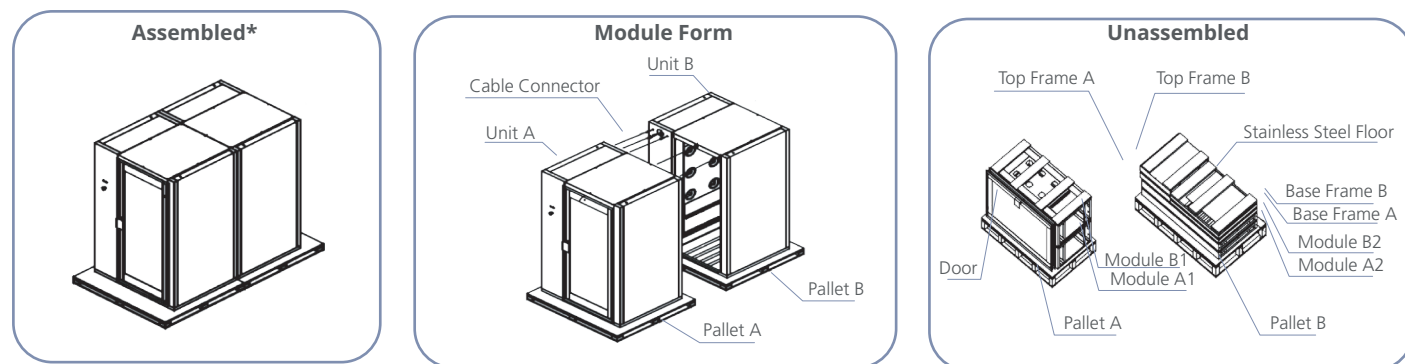

- Esco Air Shower filters meet the IEST-RP-CC001.3 recommended practice for ULPA performance (USA), and EN 1822 for H14 performance (EU).
- The automatic reset feature unlocks the doors preventing accidental lock-outs in cases when an operator opens the air shower without actually entering.
- In case of a power failure, all doors are unlocked automatically, and the settings are retained.
- A disposable pre-filter with 90% efficiency.
- The air shower is constructed with ISOCIDE antimicrobial powder coating on electro-galvanised steel sheets to minimize contamination.
- Each air shower is individually factory tested for safety and performance in accordance with international standards.
- Robust construction qualifies the air shower for the most demanding applications. The air shower is carefully assembled and readily installed and operated when shipped.
- Each unit is shipped with a documentation outlining the tests undertaken and its individual results.
- All critical electrical components are UL listed/recognized.
- The Air Shower is warranted for one year excluding consumable parts and accessories.

FAST TRACK

Experience the swiftness of our Fast Track units, ready for prompt shipment shortly after order placement, and available for delivery worldwide. Our current inventory of units is accessible at <https://www.escolifesciences.com/fast-track-units>, ensuring a seamless and expedited process to meet your needs.

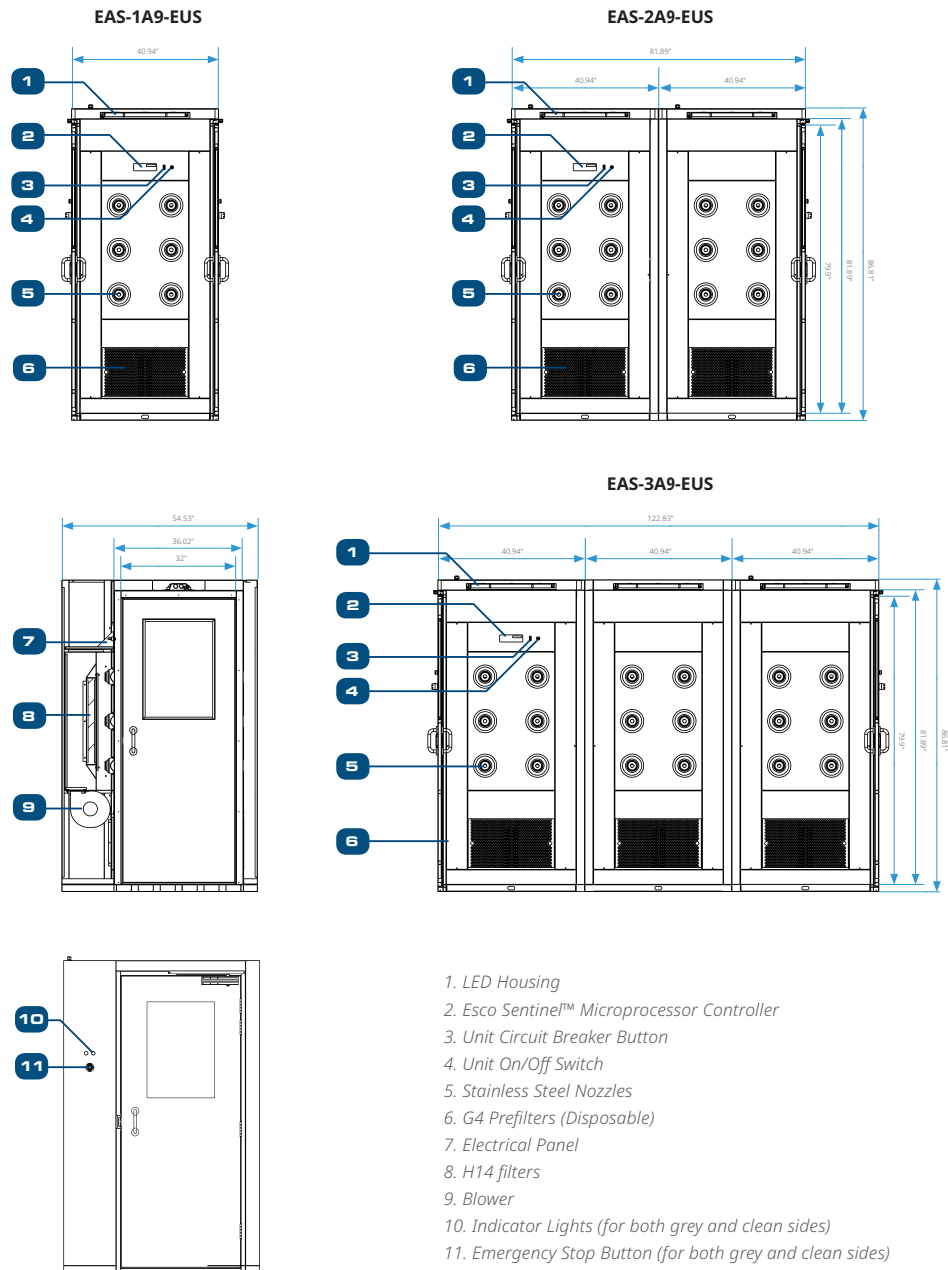

General Specifications, Cleanroom Air Shower, Model EAS-EUS (A-Series)					
Model			EAS-1A9-EUS	EAS-2A9-EUS	EAS-3A9-EUS
External Dimensions (W x D x H)			54.5" x 40.9" x 86.8"	54.5" x 81.9" x 86.8"	54.5" x 122.8" x 86.8"
Internal Work Area, Dimensions (W x D x H)			36.0" x 36.2" x 81.9"	36.0" x 77.2" x 81.9"	36.0" x 118.1" x 81.9"
Clean Door Opening (WxH)			32.1" x 79.9"		
Air Change (18 – 30 m/s)			110 - 182/ Hr	105 - 175/ Hr	104 - 172/ Hr
Initial Airflow Velocity			3,937-4,330 fpm		
Number of Nozzles			6	12	18
Air Shower Duration			Factory set at 12 seconds (adjustable upto 3 mins)		
Persons Per Cycle			1	2-3	
Personnel Flow (Persons / Minute)			4	8-12	
			The above figures are based on a Total Cycle Time of 16 seconds. (12 seconds of Air Shower + 4 seconds for buffer time / personnel entrance and exit)		
Filtration Efficiency			Filter: >99.995% at 0.3 µm Pre-Filter: Efficiency 90%		
Filtration Elements			Main Filter: HEPA 14 filter Pre-Filter: Disposable and non-washable polyester fibers		
Air Shower Construction			1.5 mm/ 0.06"/18 electro-galvanized steel / White oven-baked epoxy powder-coated finish		
Maximum Power Consumption Current	During Operation		245 W, 1.2 A, 500 BTU/ Hr	490 W, 2.4 A, 1000 BTU/ Hr	735 W, 3.5 A, 1499 BTU/ Hr
	During Standby		113 W, 0.5 A, 231 BTU/ Hr	226 W, 1 A, 461 BTU/ Hr	339 W, 1.5 A, 692 BTU/ Hr
Electrical	110-130V, AC, 50/60Hz, 1Ø				
	Note: Customer must provide isolator switch on site.				
Gross Weight			858 lbs	1452 lbs	2156 lbs
Shipping Dimensions, Maximum (W x D x H)	Assembled (W x D x H)		57.1" x 49.2" x 84.7"	57.1" x 49.2" x 84.7"	N/A

A world map with a dark blue background and light gray landmasses. The map is populated with various colored markers indicating global presence. A legend in the bottom left corner defines the markers: a blue location pin for 'Global Offices', a green square for 'Distributors', a light blue square for 'Factories', a white square for 'R&D Centers', and a red square for 'Regional Distribution Centers'. The markers are distributed across all major continents, with a high concentration in North America, Europe, and East Asia. Notable clusters include a large number of distributors and factories in the United States and Mexico, and a significant number of global offices and distributors in Europe and China. Regional distribution centers are marked in North America, Europe, and Asia.

Since 1978, Esco has emerged as a leader in the development of controlled environment, laboratory and pharmaceutical equipment solutions. Products sold in more than 100 countries include biological safety cabinets, fume hoods, ductless fume hoods, laminar flow clean benches, animal containment workstations, cytotoxic cabinets, hospital pharmacy isolators, and PCR cabinets and instrumentation. With the most extensive product line in the industry, Esco has passed more tests, in more languages, for more certifications, throughout more countries than any biosafety cabinet manufacturer in the world. Esco remains dedicated to delivering innovative solutions for the clinical, life science, research and industrial laboratory community.
